Park Homes

General Specifications:

Chassis and Floor:

- We are one of the few manufacturers who box a lip channel on the outside for added strength.
- On 12m and above we use a 275x65x20x3 Lip Channel Boxed.
- On smaller units we use a 200mm Lip Channel Boxed.
- Cross Members are 150mm Lip Channel at 600mm Centres.

Roof and Ceiling: The 5-degree pitched roof is constructed from a 50mm polystyrene core composite panel with colour coated 0.47mm zincalume on both sides with an IBR profile on top. Floor to ceiling height – 2400mm.

Sidewalls: The walls consist of a 50mm 15DV polystyrene core with 0.47mm colour coated zincalume on both sides.

Park homes can be used as the following:

- Residential units.
- Mobile clinics.
- Guard huts.
- Accommodation units.
- Classroom units.
- Kitchen units.
- Luxury office units.
- Executive class office units.
- Boardroom units.

Park Homes

Electrics: Units are wired for 220 volt supply in accordance to SABS 0142:1987.

Plumbing: Low theft SABS approved plastic piping is used for water supply and PVC for sewerage and wastewater.

Windows: Anodised aluminium top-hung windows fitted with 4mm thick glass, burglar guards and blinds.

Doors: We use the cut-out framed with specially formed aluminium sections with rubber gasket and 3 lever locks. Our park homes are pre-manufactured, assembled and commissioned in our factory. The park homes have a very strong chassis system that allows the park homes to be loaded on trucks and offloaded on site again.
